

CSB600 Solid Bronze Turned Bearings

Structure

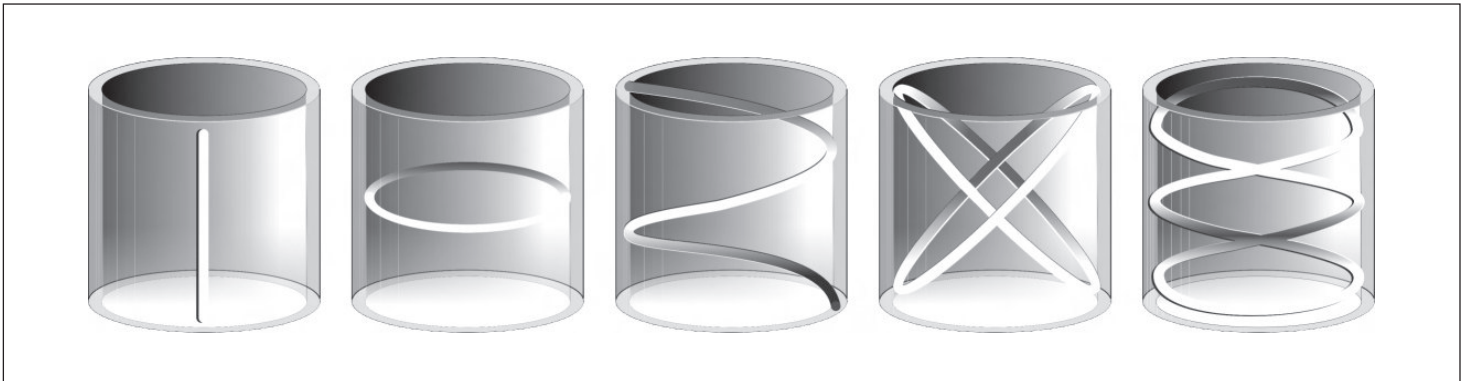

Machined cast bronze bearings offer technically and economically favorable bearings solutions. It is with high load capability, low weight and good corrosion resistance. CSB can offer different types of bronze alloys according to the required life time, service etc. The tolerance is much tighter than wrapped bronze bushes.

Available

- Cylindrical bushes
- Thrust washers
- Flange bushes
- Non-standard parts as design

CSB600 supplied by customer ordering, the tolerance is according to CSB650 standard dimension.
